relativistic

01 / [MEETING OR CLIENT NAME]

Agents can build what your people need. We give them somewhere safe to run it.

[Presenter name] · [date]

02

How we work with you

Every agent starts with access to nothing, and must be granted each resource it uses.

[SOURCE OR SPEAKER, IF QUOTED]

A fixed first deployment, then support as you grow.

01 / START

A first deployment

Cloudflare OS in your own account, connected to your sign-in and the systems that matter, with the first agents and apps your teams asked for.

02 / RUN

Support across the stack

Apps, data, platform, connected services and training, as models and teams change.

03 / GROW

A bigger team when needed

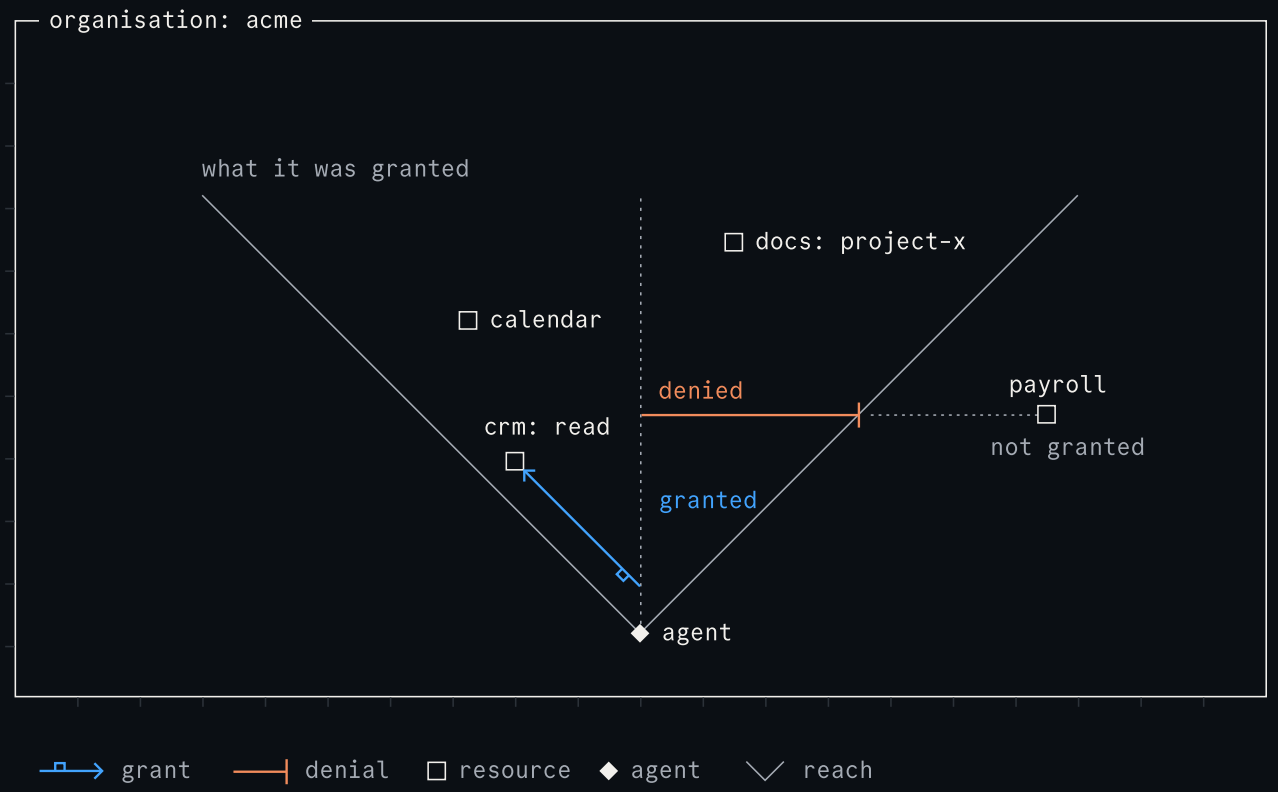

We deliver on our own or with partner consultancies.

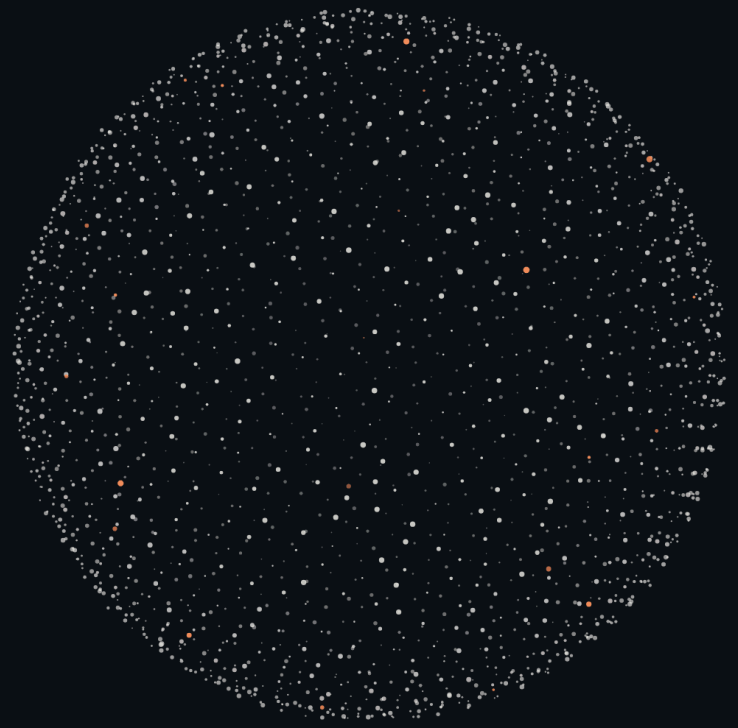

An agent reaches only what it was granted.

The cone is everything this agent may touch. It has a grant to read the CRM. Payroll is in the same organisation but outside the cone, so the request stops at the edge.

Accent arrow with a notch: a grant

Line ending in a bar: a denial

relativistic

Thank you.
